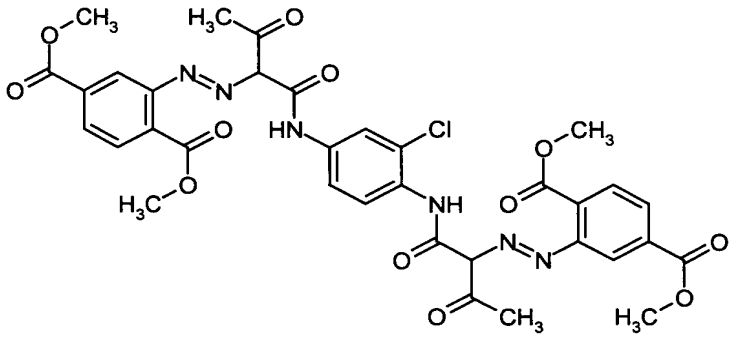
Amendments to the Claims:

1) (Currently Amended) A pigment composition comprising one or more organic yellow pigments selected from the group consisting of C.I. Pigment Yellow 213, Pigment Yellow 214 and disazo pigment in the formula (I)



(I)

and one or more inorganic pigments.

2) (Currently Amended) The pigment composition as claimed in claim 1, wherein the one or more inorganic ~~pigment~~ pigments is a titanium dioxide pigment, a bismuth vanadate pigment, a lead chromate pigment, a molybdate red pigment, a molybdate orange pigment, a cerium sulfide pigment, a silicate pigment or a complex inorganic chromatic pigment.

3) (Currently Amended) The pigment composition as claimed in claim 1 ~~or 2~~, wherein the one or more inorganic ~~pigment~~ pigments is a chromium titanium yellow, a chromium niobium titanate, a chromium tungsten titanium yellow, a nickel titanium yellow, a bismuth vanadate, a bismuth vanadate/molybdate or a combination thereof.

4) (Currently Amended) The pigment composition as claimed in ~~one or more of claims 1 to 3~~ claim 1, wherein the one or more inorganic ~~pigment~~ pigments is C.I. Pigment Brown 24, C.I. Pigment Yellow 162, C.I. Pigment Yellow 163, C.I. Pigment

Yellow 53, C.I. Pigment Yellow 118, C.I. Pigment Yellow 161, C.I. Pigment Yellow 184 or a combination thereof.

5) (Currently Amended) The pigment composition as claimed in ~~at least one of claims 1 to 4~~claim 1, wherein the one or more inorganic ~~pigment~~ pigments is ~~4)~~ C.I. Pigment Yellow 184 and the one or more organic yellow ~~pigment~~ pigments is C.I. Pigment Yellow 213.

6) (Currently Amended) The pigment composition as claimed in ~~at least one of claims 1 to 5~~ claim 1, wherein the weight ratio of the one or more organic yellow ~~pigment~~ pigments to the one or more inorganic ~~pigment~~ pigments is 0.1 : 99.9 to 99.9 : 0.1~~, in particular 10 : 90 to 90 : 10~~.

7) (Currently Amended) The pigment composition as claimed in ~~at least one of claims 1 to 6~~ claim 1, ~~comprising~~ further comprising at least one shading ~~colorants~~colorant, and ~~auxiliaries~~ at least one auxiliary selected from the group consisting of surfactants, pigmentary and nonpigmentary dispersants, fillers, standardizers, resins, waxes, defoamers, antidust agents, extenders, preservatives, drying retardants, rheology control additives, wetting agents, antioxidants, UV absorbers, light stabilizers, ~~or~~ and a combination thereof.

8) (Currently Amended) A process for preparing a pigment composition as claimed in ~~at least one of claims 1 to 7 by~~ claim 1, comprising the step of mixing ~~said~~ the one or more organic yellow pigments with ~~said~~ the one or more inorganic pigments.

9) (Currently Amended) A process for preparing a pigment composition as claimed in ~~at least one of claims 1 to 7, which comprises~~ claim 1, comprising the step of adding the one or more inorganic ~~pigment or~~ pigments during one or more of the synthesis steps of the one or more organic yellow ~~pigment comprising~~ pigments, wherein the one or more synthesis steps are selected from the group consisting of

diazotizing, dissolving the coupling component, precipitating the coupling component, azo coupling, solvent treatment, and isolating.

10) (Currently Amended) ~~The use of a pigment composition as claimed in one or more of claims 1 to 7 for pigmenting~~ A high molecular weight organic ~~materials~~ material of natural or synthetic origin pigmented by a pigment composition as claimed in claim 1~~, such as plastics, resins, varnishes, paints, electrophotographic toners and developers, and also electret materials, color filters, inks, including printing inks, ink-jet inks, and electronic inks, and seed~~.

11) (Currently Amended) A high molecular weight organic medium comprising a coloringly effective amount of a pigment composition as claimed in ~~one or more of claims 1 to 7~~ claim 1.

12) (New) The pigment composition as claimed in claim 1, wherein the weight ratio of the one or more organic yellow pigments to the one or more inorganic pigments is 10 : 90 to 90 : 10.

13) (New) The high molecular weight organic material of natural or synthetic origin as claimed in claim 10, wherein the high molecular weight organic material of natural or synthetic origin is selected from the group consisting of plastics, resins, varnishes, paints, electrophotographic toners, electrophotographic developers, electret materials, color filters, inks, printing inks, ink-jet inks, electronic inks, and seed.
